I am a **front-end developer** with a focus on **hand-crafting beautiful and intuitive user interfaces.** I believe that human-readability should always be valued over clever and concise code. I have extensive experience building high-profile websites and applications with budgets up to $4 million.

EXPERIENCE

Cox Automotive (Dealer.com) :: Burlington, VT :: October 2018-present

User Interface Engineer II - HTML/CSS/JavaScript

Responsible for developing and maintaining a large internal application used for managing online advertising across multiple platforms. Conduct weekly mentoring with teammates to help them level-up on JavaScript/ HTML/CSS skills. Collaborate with users and stakeholders to discuss user interface requirements and brainstorm UI ideas.

The Nerdery :: Minneapolis, MN :: Remote :: March 2016-October 2018

Senior Software Engineer - HTML/CSS/JavaScript

Project lead developer responsible for planning, creating and coordinating tasks for development teams. Built, maintained and integrated front-end architecture and custom WordPress themes. Collaborated with sales team, solutions engineers and UX to estimate projects with budgets from $50,000 - $4M. Provided feedback and mentorship to project team developers in the form of code reviews. Effectively communicated with clients to ensure project scope and execution was aligned with project goals.

The Nerdery :: Minneapolis, MN :: Remote :: Nov. 2013-March 2016

Software Engineer - HTML/CSS/JavaScript

Front-end developer responsible for architecting and building client-side web applications and responsive CMS driven websites with semantic HTML, object-oriented CSS and JavaScript. Built custom WordPress themes and functionality.

JHJ Designs :: South Burlington, VT :: Sept. 2010-Nov. 2013

Owner/Freelance Web Designer/Front-End Developer

Responsible for all aspects of website design and development. Estimated and scoped projects. Organized information architecture and wireframes, created page layouts using Photoshop and Illustrator. Integrated front-end code into various CMS platforms including WordPress, Expression Engine and Magento Commerce.
